

Abrar Faiyaz Khan

Product Designer · AI Design Engineer · Co-founder, Orizon Space

EMAIL khan.abrar.faiyaz@gmail.com PHONE +880 1857 455477 LOCATION Dhaka, Bangladesh

Product designer who designs **and** builds. I take ideas from research and user flows to high-fidelity Figma prototypes, then ship them as working products using AI-assisted frontend workflows. Recent work includes **Open Campus**, an AI-native university platform and **Lumen**, an AI PDF reader, both built solo. I care about human-centered interaction, systemised design, and the small details that make a product feel right.

SKILLS

Design

- Product Design UI Design
- Interaction Design User Flows
- Wireframing Prototyping
- Design Systems Design Tokens
- Brand Identity

Build

- AI-assisted Frontend
- React · TypeScript Tailwind CSS
- HTML · CSS GSAP Supabase
- WordPress

Research & Strategy

- User Research Information Architecture
- Marketing Research Product Strategy

TOOLS

- Figma Framer Lovable Claude
- Canva WordPress
- Google Workspace

EXPERIENCE

Co-founder & Product Designer · Orizon Space / Freelance

Present

Design & product studio · Dhaka, Bangladesh

- Lead product, UI and web design for clients end to end, from discovery and user flows to high-fidelity prototypes and build.
- Delivered a website redesign for Central Scientific Co. and a logo identity system for General Scientific Company Ltd.
- Designed user-centred e-commerce and corporate websites and marketing campaigns focused on usability and conversion.

Digital Marketing Intern · Axilweb

Sep 2025 – Mar 2026

Dhaka, Bangladesh

- Designed landing pages and UI in Figma and built them with WordPress, HTML and CSS on a live e-commerce platform.
- Produced social and campaign creative alongside marketing and development teams.
- Applied user-centred design practice to improve page structure, clarity and the path to purchase.

SELECTED PROJECTS

APP DEVELOPMENT

Open Campus · AI-native university platform

opencampus.lovable.app

- Turns free lectures from MIT, Stanford and Harvard into sequenced, multi-semester degree paths instead of a loose course catalogue.
- Designed and built solo; pitched at the National Innovation Fair Bangladesh.
- Includes NORA, a character prototype for a curriculum-aware AI tutor.

Stack · Figma, Lovable, React, TypeScript, Tailwind, Supabase

Nora AI · Expressive AI chatbot

nora-ai-personal.lovable.app

- An AI character that notices you: her eyes follow your cursor, and she takes text or voice.
- Keeps a calendar and task list beside her; designed and built solo as a live prototype.

Stack · Lovable, React, TypeScript, Tailwind, Supabase

Bloom Healthcare · Women's health app

- Period tracker for adenomyosis and endometriosis, designed first for women in Bangladesh.
- Daily symptom log, monthly pain heatmap and calendar; in development.

Stack · Figma, iOS

Lumen · AI PDF reader

lumenresearchchai.lovable.app

- Coordinate-anchored annotations that stay pinned to the exact spot on the page.
- Multi-provider model switching, refined through extensive QA toward a mobile-first PWA.

Stack · Figma, Lovable, React, TypeScript

Dhaka Transit · Public transport PWA

dhaka-transit.lovable.app

- Mobile-first route finder for Dhaka buses, now evolving into a unified bus, metro and walking journey planner.

Stack · Figma, Lovable, PWA

SOLO · Music discovery

wheremusicfindsyou.lovable.app

- Sign-up-free music discovery for web and mobile that hands playback off to Spotify; designed in Figma, prototyped live.

Stack · Figma, Lovable · Behance case study

CASE STUDIES

One Citizen · Civic mobile app

behance.net/gallery/250955773

- Public services in one app: NID registration, hospital booking, payments and tracking.

Farmer Card · AgriTech mobile app

behance.net/gallery/249662703

- Digital identity and financial access for Bangladeshi farmers: loans, subsidies and market prices.
